

Aks Kantarı

MODEL: AKS

FİYAT: 15 ton

Description

AKS Model axle wheel weighing systems are made high strength special aero industry aluminum material, anti-overloading ability.

Lightweight, and convenient transportation with handle

Integral flat plate construction, high frequency in dynamic response, and high precision.

Built-in radio module for weight transmission to a remote indicator or external device.

internal rechargeable battery about 50 hours battery life

Application

Load control and weighing for the vehicles.

Measuring the weight and bary center of aeroplane.

Measuring weight for special purpose.

Specification

AKS

Wireless Frequency	470MHz
Wireless Distance	Min:100m (default)
A/D Conversion Rate	≥50times/seconds
Operating Temp.Range	-20 ~ + 80°C
Operating Humidity	≤85%RH under 20°C
Battery Life	≥50 hours
Non-Linearity	0.01%F.S
Stable Time	≤5 seconds

MODEL	CAPACITY	DIMENSIONS (mm)
AKS	15 tonx5kg	600x600x69
